YOU + CROF = HOPE, PROGRESS and ACTION

Did you know half of all people treated for cancer receive radiation treatment?
Did you know that radiation treatment cures a large number of patients with cancer every year?
Did you know that radiation treatment is very effective in reducing and controlling cancer pain?
Every day, across Canada, our brightest cancer specialists and researchers pursue new insights into radiation oncology. They are driven by one goal: developing effective cancer treatments that will result in fewer side effects and disabilities, and, ultimately, save more lives.

A donation to the Canadian Radiation Oncology Foundation (CROF) says you share our goals. It is an important expression of support and hope – hope in the promise of young scientists and accomplished investigators, closing in on cancer prevention, treatment and cure. Your gift also extends an expression of support and hope to all Canadians whose lives are touched by cancer, your families, your neighbours, and your community.

Please join CROF in providing needed resources to support radiation medical treatment of cancer and help us spread the word to increase Canadian's knowledge and awareness of this very important cancer treatment. Your donation will immediately support areas of highest priority. With your support we can continue to provide hope, comfort, and the best technological treatment while we search for a cure.

Please give generously today.

Ida Ackerman
President, CROF
