

24th CARO Annual Scientific Meeting

Research, Discovery, Collaboration and Education in Radiation Oncology and Physics

Wednesday, September 22 - Saturday, September 25 | Hyatt Regency Vancouver, BC

CARO 2010

Objectives for CARO 2010

The CARO 2010 Annual Scientific Meeting has been developed to provide an opportunity for participants to interact with colleagues and experts in the field of physics. This meeting will allow participants to:

- Describe the new trends and discovery in collaborative in Radiation Oncology and Physics.
- Set the base of common goal and future collaboration in education and research in Radiation Oncology and Physics.
- Better understand and articulate the role of the physicist and the radiation oncologist to promote high standard of care in radiation therapy.
- Understand the impact of new technology on the workload and treatment access to radiation therapy program.
- Understand the importance of collaboration between medical physics and clinician for the education of resident in physics and radiation therapy.

Who Should Attend

- Radiation oncologists, physicists, therapists, nurses and administrators
- Residents, students, trainees
- Radiobiologists, graduate students
- Any health professional interested in radiation oncology
