

## **CROF is Pleased to Announce the Winner of the 2010 Second Annual CROF-Flims Grant**

### **Dr. Andrew Hope**

The Canadian Radiation Oncology Foundation (CROF) is pleased to announce Dr. Andrew Hope as the recipient of the First Annual CROF-Flims Grant. Dr. Hope will be attending the 12<sup>th</sup> joint **ECCO-AACR-EORTC-ESMO Workshop 'Methods in Clinical Cancer Research' Waldhaus Flims, Switzerland, 19--25 June, 2010.**

The one-week, intensive resident training course offers a unique opportunity for about 80 young oncologists to learn the essentials of clinical trials and be in direct contact with experts in this specific field.

This is **CROF's** second year in providing support to the Flims Workshop by sponsoring **one CARO candidate** with a proposal in radiation oncology<sup>1</sup> to attend the Workshop.

A University of Wisconsin Medical School, graduate, Dr. Hope is a new investigator at PMH treating lung and ENT malignancies. His research is focused on development of methods to predict, prevent, and mitigate the normal tissue effects of radiation, primarily in patients with lung malignancies.

**CROF** congratulates Dr. Hope on his achievement and wishes him continued success in his studies and career! We look forward to hearing about this prestigious workshop from Dr. Hope upon his return.

It is with your support that **CROF** can continue offering future educational endeavours.

**YOU + CROF = HOPE, PROGRESS and ACTION**
