

### **Fellowship Position Available**

The Ottawa Hospital Cancer Program, affiliated with the University of Ottawa, is one of the largest cancer programs in Canada. We have an active fellowship program with candidates in place at present. Our radiation treatment facilities include: three wide bore CT simulators with 4D capability, high dose rate and low dose rate Brachytherapy, eight Elekta Linear Accelerators with cone-beam CT capability and several VMAT capable units. There are two Tomotherapy units and one CyberKnife unit. The main planning system used is CMS Focal/XIO/Monaco, with separate dedicated systems for Tomotherapy and Cyberknife.

The Ottawa Hospital Cancer Centre is the sole provider of radiation oncology services in the Champlain LHIN (population 1.3 million) with over 5000 new patient consults annually.

### **Fellowship in CNS/Spine Stereotactic Radiosurgery**

The Ottawa Hospital Radiation Oncology Staff has over 20 years of CNS Radiosurgery experience having treated over 2500 cases. The current CNS Radiosurgery case load is over 300 patients per year. The Ottawa Hospital has 5 physicians with CNS Radiosurgery expertise including 3 Radiation Oncologists and 3 Neurosurgeons.

Fellowship Experience would include management of malignant and benign brain, skull base, head and neck, and spine tumours and functional Radiosurgery. The goal of the fellowship would be to provide both clinical and research experience in CNS and Spine Radiosurgery with an expectation of the presentation of data at a National and/or International Meeting and at least one publication in a peer-reviewed journal. A minimum of 50% of time would be protected for research directed activities.

### **Application details**

All qualified candidates may apply; however, preference will be given to Canadian applicants who have successfully completed Royal College certification in Radiation Oncology. Equity is a University of Ottawa policy; women, aboriginal peoples, members of visible minorities and persons with disabilities are encouraged to apply.

Qualifications will include FRCPC in Radiation Oncology or equivalent and candidates must be eligible for educational Licensure in the Province of Ontario. Remuneration will

be commensurate with clinical experience and in accordance with post-graduate scales as defined by the University of Ottawa. Funding is available for travel to conferences at which the fellow will be presenting. Candidates must be competent in both spoken and written English.

Applications are due by Sept, 1 2017 for fellowships commencing July 1, 2018 but the start date is negotiable. Please include:

1. Curriculum Vitae
2. Three recent letters of reference
3. Letter outlining interest in fellowship, learning goals and potential projects

Further details are available on request. Non-Canadians will be required to submit further documentation. The final selection process will include an electronic application to the University of Ottawa and an interview.

Please send the completed application (please specify which fellowship you would prefer) to
