

BC/BE Radiation Oncologist

Central Care, PA, a private practice organization located in Kansas and Missouri, USA, has an opportunity for a full-time board certified/board eligible Radiation Oncologist. This position will work with a full team of physicists and dosimetrists. The successful candidate will join an independent multidisciplinary oncology team of 5 full-time Radiation Oncologists and 9 full-time Medical Oncologists to provide high tech cancer care throughout 14 locations in Kansas and Missouri.

We are a technically progressive organization with the goal of providing the highest quality of cancer care in a comprehensive fashion. We offer a large variety of services within our organization, including IGRT, SRS, SBRT, HDR, and LDR. Central care also provides all aspects of practice management, including administration, billing and marketing. Central Care is a rapid growing practice with opportunities throughout its 14 locations.

Advanced Equipment and Technology:

- TrueBeam
- Varian 2100EX
- Varian Trilogy with Brainlab
- Eclipse TPS and Brainlab iPlan
- Impac Mosaiq EMR

Additional Advantages of working for Central Care, PA:

- Base Compensation Plus Incentives at the discretion of the CEO
- Employer will assist with Relocation Costs
- New Grads and Visas Welcome
- Internal Coverage for PTO and CME
- Future Growth Opportunities Possible

Central Care, PA will be in attendance at the Annual Scientific Meeting in Toronto, ON. Come visit our booth at this event for more information.
