

## **Radiation Oncology Fellowship Position**

The Division of Radiation Oncology, Department of Oncology is seeking applications for up to two Fellowship Positions for 2018-2019.

Clinical and research activities will focus on brachytherapy, stereotactic body radiation therapy (SBRT), and/or patient reported outcomes but other areas of specialization can be accommodated based on the successful candidate's interest. This one-year fellowship will provide an opportunity to gain clinical expertise, research and publication productivity. The Division of Radiation Oncology has close collaborations with the Arnie Charbonneau Cancer Institute for candidates interested in translational research activities.

The Tom Baker Cancer Center (TBCC) is a full-service, academic cancer centre with 8 linear accelerators, orthovoltage and LDR/HDR capabilities. There are active gyne, prostate and breast brachytherapy programs. TBCC includes the provincial Alberta Radiosurgery Centre and expanding programs for lung, liver and spine SBRT. There are close interdisciplinary working relationships with Medical, Surgical, Gynecologic, Hematologic, Psychosocial Oncology, Palliative Care, Medical Physics and basic science faculty.

Calgary is a growing city with a vibrant cultural scene and ready access to outdoor activities in Kananaskis Country, Banff, Lake Louise and the Rockies (1.5 hours).

Candidates must have successfully completed Radiation Oncology specialty training. In accordance with Canadian immigration requirements, preference will be given to Canadian citizens or permanent residents of Canada. The University of Calgary respects, appreciates, and honours diversity.

Interested applications will be required to submit a CV, three letters of reference, and a personal statement regarding their interest in pursuing a fellowship in the Department of Oncology at the University of Calgary. Remuneration will be commensurate with clinical experience and in accordance with post-graduate scales defined by the University of Calgary.
